## Year 5 maths

$\left.\begin{array}{|l|l|}\hline \text { Key performance indicator } & \text { Performance standard } \\ \hline \text { Number and place value } & \text { With reference to the KPIs } \\ \text { Reads, writes, orders and compares } \\ \text { numbers to at least } 1,000,000 \text { and } \\ \text { determines the value of each digit }\end{array} \quad \begin{array}{l}\text { By the end of Y5, a child should be fluent } \\ \text { in formal written methods for addition and } \\ \text { subtraction. Using a developing } \\ \text { knowledge of formal methods of } \\ \text { multiplication and division, a child should } \\ \text { be able to solve problems including } \\ \text { properties of numbers and arithmetic }\end{array}\right\}$

## Multiplication and division

Identifies multiples and factors including finding all factor pairs of a number and common factors of two numbers

Solves problems involving multiplication and division including using a knowledge of factors and multiples, squares and cubes

Solves problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates

Fractions (including decimals)
Compares and orders fractions whose denominators are all multiples of the same number

Reads and writes decimal numbers as fractions eg 0.71 $=71 / 100$

Reads, writes, orders and compares numbers with up to three decimal places

## Performance standard <br> With reference to the KPIs

By the end of Y 5 , a child should be fluent in formal written methods for addition and subtraction. Using a developing knowledge of formal methods of multiplication and division, a child should be able to solve problems including properties of numbers and arithmetic

A child can: fractions, decimals and percentages;

- classify shapes with geometric properties and use the vocabulary needed to describe them; and
- read, spell and pronounce mathematical vocabulary correctly.

Solves problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4,1 / 5,2 / 5,4 / 5$ and those fractions with a denominator of a multiple of 10 or 25

## Measurement

Converts between different units of metric measure (eg kilometre and metre; centimetre and metre; centimetre and millimetre; gram and kilogram; litre and millilitre)

Measures and calculates the perimeter of composite rectilinear shapes in centimetres and metres

Calculates and compares the area of rectangles (including squares), and including using standard units, square centimetres (cm2) and square metres (m2)

Geometry: Properties of shape
Draws given angles and measures them in degrees (0)

Distinguishes between regular and irregular polygons based on reasoning about equal sides and angles

Geometry: position and direction
Covered in Y6
Statistics
Completes, reads and interprets information in tables, including timetables
